SUBJECT INDEX FOR ABSTRACTS

Note: Abstracts are referred to by number

A

Abnormalities—
In cattle, 9
Alfalfa Hay—
Nutritive values at three stages of maturity, 188
Alfalfa Meal—
Effects on reproduction and gains in beef cows, 191
Alfalfa Pasture—
Blood components in cattle grazing, and relation to bloat, 134
Anemia—
Alleviation of, in young calves, 117
Animal Fat—
Effect on performance and carcass characteristics of steers, 95
Anthelmintic Activity—
Compounds added to feed and water of swine, 239
Antibiotics—
Effect of, on swine, 101
Effect of, on urinary calculi, 113
Antibody—
Effect of treatment of semen with, in rabbits, 205
Response in baby pigs challenged with Serallia Marcessena, 238
Antioxidants—
In lard and dry-cured bacon, 60
Appetite Stimulants—
Hypoglycemic compounds for baby pigs, 217
Arsanilic Acid—
In counteracting selenium poisoning in cattle, 123
Reproductive performance of rats fed, 197
Arsonic Compounds—
Effect of backfat thickness of swine, 63
Artificial Insemination—
Effect of, of gilts with stored semen, 199
Effect of pitocin on fertility in gilts, 200
Artificial Rumen Technique—
To estimate nutritive value of forages, 136
Atarex—
Effect of, on steers, 88
Aureomycin—
Effects of, on wormed pigs, 102
For pigs in dry lot and on pasture, 103
Influence on steers fed alfalfa soilage, 186

B

Baby Pig—
Antibody response of, 238
Appetite stimulants for, 217
Creatine in diet of, 67
Factors contributing to within treatment in, nutrition experiments, 65
Bacitracin—
For pigs in dry lot and on pasture, 103
Backfat Thickness—
Effect of arsonic compounds on, of swine, 63
Bacterial Agents—
Effects of, on control of scours and growth of pigs, 100
Barley—
Lysine supplementation for, rations, 69
Beef—
Chlorpromazine in, tissues, 53
Genetic aspects of tenderness in, 4
Goitrogenic residues in, tissue, 232
Muscle-bone relationship in, 57
Technique in determining tenderness, 48
Tenderness and juiciness of, 46
Beef Acceptability—
Rated by panel and shear test, 42
Beef Calves—
Birth to weaning growth, and future performance, 29
Beef Ribeye Muscle—
Measurement of marbling deposits in, 47
Birth Weight—
Effects of, on gain of Yerlikara calves, 30
Bloat—
Etiology, prophylaxis and therapy, 213
Incidence of, and properties of rumen contents, 171
Inhibition with drinking water additives, 135
Body Length—
Variation in weight constant, measurements, 28

Body Size—
Quantitative inheritance of, in mice, 18
Blood Typing—
Freezing and storing cattle erythrocytes for, 211
Breed—
Influence of, on feed-lot performance of crossbred steers, 13
Breeding—
Summer, performance of sheep, 16
Bulls—
Weight constant body length measurements, 28
Butterfat—
Production of naturally and artificially sired cows, 27

C

Calcium—
Blood levels in Florida beef cattle, 116
Effect of dietary, on zinc excretion, 127
Effect of stilbestrol on metabolism of, 111
Effects of replacement of dietary, by strontium on pigs, 167
Serum alkaline phosphatase as affected by, in swine, 126
Calcium Aluminogluconate—
Responses of the bovine to, 112
Calf Growth—
Correlated with yield and composition of milk of beef heifers, 219
Calf Production—
Under four pasture systems, 31
Calorie-Protein Ratio—
Effect of, on digestibility, feed efficiency, and weight gain in swine, 77
Influence of season and weight on optimum, 76
Candida Albicans—
Artificially administered cultures of, to swine, 106
Carbohydrates—
Influence of, on intestinal microorganisms in baby pigs, 83
Carcass—
Effects of stilbestrol on lambs, 41
Feathering and overflow as related to marbling content of pork, 34
Production of lightweight lamb, 61
Relationship between tissues of ham and empty body of swine, 37
Carcass Characteristics—
Effect of electric shock treatment on, of swine, 38
Effect of feeding sugar on, of swine, 38
Effect of levels and source of fiber upon, of swine, 80
Effect of sex and stilbestrol on, of swine, 110
Effects of types and breeds of cattle on, 44
Influence of sire upon, of steers and heifers, 3
Live animal measurements and, of lamb, 40
Of pasture fattened steers, 95
Of swine as affected by ration levels of protein and fat, 78
Of western lambs with stilbestrol implants, 185
Carcass Composition—
Effect of estrogenic and androgenic compounds on, of swine, 109
Limited *vs* full feeding as related to, 58
Carcass Fats—
Stabilization by addition of antioxidants to ration, 39
Carcass Grade—
Correlations between, and beef tenderness, 45
Influence of, on consumer preference, 7
Carcass Measurements—
Live hog scores and, 59
Relationship of live animal measurements to, in beef, 43
Carcass Quality—
Effect of 3-nitro-4 hydroxyphenylarsonic acid on, of swine, 107
Factors affecting, 97
Of fattening lambs, 97
Swine, evaluated by live animal measuments, 1
Cellulose Digestion—
Comparison of, *in vitro* and *in vivo*, 140
Effects of chelating agents on, by rumen microorganisms, 138
Sulfur sources for, by rumen microorganisms, 141
Chelating Agents—
Effects on cellulose digestion by rumen microorganisms, 138
Chlorpromazine—
Residues in beef tissues, 53

Chlortetracycline—
Field evaluation in swine rations, 104
Influence of, for steers, 95
Choline—
Effects of, on steer performance, 96
Chromic Oxide
Diurnal excretion pattern in cattle, 163
Fecal excretion pattern of, by heifers, 162
Method for determining digestible energy and protein, 161
Concentrate to Roughage Ratio—
Effect in self-fed mixtures for fattening steers and heifers, 155
Effect of, on fattening lambs, 97
Conception Rate—
Variation in, in Holstein heifers, 257
Variation in parous Holstein cows, 207
Consumer Preference—
Carcass grade and fatness of steers on, 7
Copper—
Effect of dietary on liver content of calf, 118
Effect of feeding, to pigs, 130
Corn—
Effects of variations in drying on nutritive value of field shelled, 175
Low *vs* high moisture, swine, 173
Corn Silage—
Digestion of, by dairy cattle, 168
Corpora Lutea—
Influence of hysterectomy and progesterone of, in gilts, 247
Progesterone-induced regression of, in gilts, 247
Corticoids—
Effect of four synthetic, in the cow, 198
Creatine—
In diet of baby pig, 67

D

Dairy Cattle—
Comparison of long hay, pellets and field baled legume hay for cows, 74
Raising calves without whole milk, 64
Dehydrated Forage Meals—
Contribution of, to growth and liver stores of vitamin A in swine, 87
Diallyl Hexestrol—
Effects of, on steer performance, 96
Digestibility—
Effect of calorie-protein ratio on, 77
Effect of different combinations of energy and protein, 159
Digestibility—Cont.
Effect of grinding on, hays, 182
Forage, as related to lignin and methoxyl groups, 181
Influence of fatty acids upon, by lambs, 146
Of soybean hulls, 147
Seasonal variation in, of pasture swards, 183
Dried Corn Distillers' Solubles—
And certain minerals in prevention of parakeratosis, 124
Dwarfism—
X-ray method of detecting, 11
Dwarfs—
Physio-chemical and microbiological studies on, 12
Dynafac—
With pelleted rations for cattle, 93

E

Embryonic Mortality—
Effect of estrogen and progesterone on, in ovariectomized gilts, 249
Embryonic Survival—
Effect of semen volumes and sperm concentrations on, in gilts, 258
Energy—
Cessation of estrus and ovarian activity in beef heifers on low levels of, 192
Effect of level on volatile fatty acids in the rumen, 145
Effect of, on ration digestibility, 159
Use of chromic oxide method for determining digestible, 161
Energy Density—
Effect on vitamin B requirements of weanling pig, 82
Energy Level—
Effect on protein requirement of lambs, 91
Energy Metabolism—
Determination of, with sheep, 156
Energy Source—
Relation to urea utilization by rumen microorganisms, 137
Energy Value—
Determination of, of feeds for the weanling pigs, 81
Erythrocytes—
Freezing and storing cattle, for blood typing, 211

Estradiol-Progesterone Implants—
Influence on gain of beef calves, 92
Estrual Activity—
In fall-lambing ewes, 241
Estrus—
Cessation in heifers on low levels of energy and protein, 192
Post-partum, in ewes, 240
Synchronization of, in swine, 250
Estrogen—
Effect on embryonic mortality in ovariectomized gilts, 249
Effects of a plant, on reproduction in mice, 224
Metabolism in ewe, 244
Estrogenic Activity—
Of fresh and dried forages, 184
Estrogen-Androgen—
Combinations for fattening wether lambs, 98
Effect of, compounds on swine, 109
Estrous Cycle—
Effects of oxytocin, prolactin and human cherionic gonadotrophin in ewe, 243
Pituitary gonadotrophins in swine, 246

F

Fat—
Adding animal, to swine rations, 79
Dietary, and protein interrelationships, 151
Effect of added, in wintering rations, 152
Effects of dietary, on fatty-acid composition of steer depot fat, 150
Effects of, on steer performance, 96
Level of, on performance and carcass characteristics of swine, 78
Fatty Acids—
Composition of steer depot fat, 150
Influence on digestibility of rations by lambs, 146
Feed Additives—
For fattening beef calves, 89
Feeding Programs—
Pigs weaned at 3 or 8 weeks, 84
Fertility—
Effect of pitocin on, in gilts, 200
Effect of semen volumes and sperm concentrations on, in gilts, 258
Effects of treatment of semen on, in rabbits, 205
Influence of sterile teaser rams, 242
Of bull semen, 202
Fiber—
Levels and source of, upon growth and carcass characteristics of swine, 80
Fish Liver Oil—
Anti-vitamin E effect, 149
Fleeces—
Measuring staple crimp of grease locks from, 23
Fluorine—
Effects of feeding, to beef cows, 119
Forages—
Estrogenic activity in fresh and dried, 184
Nutritive value by artificial rumen technique, 136
Utilization of nitrated and un-nitrated, by rumen microorganisms, 179
Fringed Tapeworm—
Removal of, with hygromycin, 170

G

Genetic Analysis—
Of, B, F-V and Z blood-group loci, 10
Genetic Aspects—
Tenderness in beef, 4
Genetic Correlations—
Between growth and feed utilization in swine, 5
Genetic Factors—
Affecting weaning performance of calves, 21
Genistin—
Effect on reproduction in mice, 224
Gestation—
Pyridoxine supplementation of swine diet, 85
Gibberellin—
Evaluation of, in lamb rations, 94
Nutritional studies with, in swine rations, 66
Goitrogenic Residues—
Radioactive tracer technique for assaying, in beef tissues, 232
Gonadotrophin—
In sheep pituitaries after hypothalamic lesions, 245
Pituitary, in swine, 246
Grass-Legume Silage—
Effect of, on thyroid activity, 172
Grazing Treatments—
Cattle gains on crested wheat grass as influenced by, 187

Grease Locks—
Length of individual fibers in, 24
Measuring staple crimp of, 23
Grinding—
Effect on voluntary consumption and digestibility of hays, 182
Growth Promoting Substances—
In blood of cows, 254

H

Hams—
Myoglobin concentration in, 50
Shrinkage and keeping quality of dry-cured, 49
Smoking and temperatures on keeping quality of, 51
Heat Acclimation—
Effect of, on responses of dairy heifers, to various temperatures, 233
Heat Tolerance—
Predicting, from calf vaporization rates, 236
Hemoglobin—
Effect of iron on, of baby pig, 131
Levels of, in Florida beef cattle, 116
Heritability—
Feeding period on, of post-weaning gain of cattle, 14
Of TDN/cwt, 20
High-Energy Rations—
For fattening beef calves, 154
Hormone—
Anterior pituitary-like activity in blood of bulls, 252
Feed-lot response of steers to, 19
Influence of levels on milk secretion, 255
Hydroxyproline—
Total, and tenderness of bovine muscle, 56
Hygromycin—
A and B for pigs in dry lot and on pasture, 103
Effect of, on fattening lambs, 218
Effect of, on swine, 101
Effects of, B on wormed pigs, 102
Removal of "fringed tapeworm" with, 170
Hysterectomy—
Influence on corpora lutea in gilts, 248

I

Implants—
For fattening beef calves, 89
Iodine—
Radioactive, influenced by methimazole, 231
Requirement of young pigs, 228
Iron—
Effect of feeding, to pigs, 130
Effect of oral *vs* injectable, on baby pigs, 131
Metabolism in the calf, 227
Oral requirement of baby pig, 132
Sources and levels for baby pigs, 226

L

Lactation—
Hormones to extend in parturient rats, 223
Induced, in non-pregnant ewes, 221
Lecithin—
Effects of, on steer performance, 96
Legume-Grass Silage—
Milk production, feed intake and digestibility following initiation of, feeding, 157
Light—
Effect on thyroid activity, 235
Lignin—
In relation to digestibility of forages, 181
Linseed Oil Meal—
As a preventative of muscular dystrophy, 122
Litter Size—
Prenatal, in gilts, 225
Lysine—
Requirement of weanling pigs, 68
Supplementation of barley rations, 69

M

Mammae—
Location in relation to suckling preference of pigs, 222
Mammary Involution—
Hormones to prevent, in parturient rats, 223
Manganese—
Requirements of cattle, 174
Magnesium—
Interrelationships between, and tocopherol in the dairy calf, 121
Meat Production—
Limited *vs* full feeding, 58
Metabolic Fecal Nitrogen—
In lambs as determined by regression and by low nitrogen rations, 177

Methimazole—
Influence of, in cattle rations, 72
Iodine and basal metabolic rates as influenced by, 231
Methoxyl Groups—
In relation to digestibility of forages, 181
Micro-Organisms—
Influence of carbohydrates on intestinal, in the baby pig, 83
Milk—
Production of naturally and artificially sired cows, 27
Yield and composition from beef heifers, 219
Milk Secretion—
Effect of thyroxine levels, 230
Influence of hormone levels, 255
Milk Production—
Following initiation of legume-grass silage feeding, 157
Molasses-Urea-Alcohol—
Feeding, supplement to fattening lambs, 71
Muscular Dystrophy—
Selenium, vitamin E and linseed oil meal as preventative, 122
Multiple Paternity—
Effect of mating behavior, order, frequency and interval between mating on, 15
Myoglobin—
Variations of, in hams, 50

N

Nitrate—
Effects on reproduction and vitamin A storage, 196
Nitrogen—
Effect of roughages on utilization, 158
Effect of stilbestrol on metabolism of, 111
3-Nitro-4 Hydroxyphenylarsonic Acid—
Effect of, on swine, 107
NPN Compounds—
Microbiological assay for determination of utilization of, by rumen bacteria, 142
Nucleic Acid—
Rumen microbial protein and, anabolism, 144

O

Oleandomycin—
In lamb and steer rations, 99
In swine rations, 105
Ovariectomy—
Effect on bactericidal activity of rabbit uteri, 208
Ovulation—
Effect of glucose feeding in gilts, 194
Influence of stilbestrol on, in gilts, 225
Synchronization of, in swine, 250
Oxytetracycline—
Effects of, on steer performance, 96

P

Parakeratosis—
Prevention of, in swine, 124
Pasture Swards—
Evaluation of, 183
Pelleted Rations—
For fattening beef cattle, 75
For suckling lambs, 73
Pelleting—
Effect of, on fattening lambs, 97
Effect of, on urinary calculi, 113
Penicillin—
For pigs in dry lot and on pasture, 103
Influence on steers fed alfalfa soilage, 186
Phosphatase—
Serum alkaline, as affected by dietary calcium and zinc levels in swine, 126
Phosphorus—
Blood levels in Florida beef cattle, 116
Effect of stilbestrol on metabolism of, 111
Phosphorus Boluses—
Effect on grub count and performance of steers, 166
Pitocin—
Effect in gilts artificially inseminated, 200
Placentation—
Process of, in the bovine, 206
Pork—
Physical, chemical, and organoleptic relationships in fresh, 55
Pork Muscle—
Effects of rations on water-binding properties of, 36

Pork Muscle—Cont.
Physical and chemical characteristics of, 54
Pregnancy—
Effect of injection of rabbits with rabbit embryo brei, 210
Pituitary gonadotrophins in swine, 246
Progesterone in bovine tissue during, 253
Pregnancy Loss—
Variation in Holstein heifers, 257
Variation in parous Holstein cows, 207
Prenatal Development—
In swine as affected by nutritional environment, 195
Producer Sponsored Sales—
Grade and price at, in Maryland, 33
Progeny-Testing—
Developments in, dairy sires in New Zealand, 25
Progesterone—
Effect on embryonic mortality in ovariectomized gilts, 249
In bovine organs and blood, 253
Influence on corpora lutea in gilts, 248
Influence on reproductive activity in cattle, 209
Protein—
Adequacy of all-plant *vs* plant and animal, rations for swine, 86
Cessation of estrus and ovarian activity in beef heifers on low levels of, 192
Dietary fat and, interrelationships, 151
Effect of energy level on, requirement, 91
Effect of level on lysine requirement of weanling pigs, 68
Effect of level on volatile fatty acids in the rumen, 145
Effect of, on ration digestibility, 159
Effect of stilbestrol on, requirements of steers, 169
Effect on production and gains in beef cows, 191
Effect on yield and composition of milk from beef heifers, 219
Level of, on performance and carcass characteristics of swine, 78
Rumen microbial, and nucleic acid anabolism, 144
Use of chromic oxide method for determining digestible, 161
Protein-Energy Ratio—
Effect on performance of steers, 176
Purified Type Ration—
Performance of steers fed, 133
Pyridoxine—
Supplementation of swine gestation diet, 85

R

Renal Function—
Phenolsulfonphthalein clearance test in ewes, 212
Reproduction—
Effect of condition on, in swine, 193
Effects of nitrate on, in swine, 196
Effects of protein and alfalfa meal on, in beef cattle, 191
In swine, as affected by nutritional environment, 195
Reproductive Activity—
Influence of progesterone on post partum, in cattle, 209
Reserpine—
Effect on thyroid secretion, 229
Rhomboideus (Hump) Muscle—
In Zebu and European type cattle, 237
Roughage-Concentrate Ratios—
Effect on production and recycling of volatile fatty acids by rumen microorganisms, 143
Rumen Bacteria—
A microbiological assay for the determination of NPN utilization, 142
Rumen Contents—
Properties of, in bloat, 171
Rumen Microorganisms—
Availability of sulfur sources for, 141
Characteristics of hemicellulolytic activity of, 139
Effect of roughage-concentrate ratios upon production and recycling of volatile fatty acids by, 143
Effects of chelating agents on cellulose digestion by, 138
Relation of energy source to urea utilization by, 137
Utilization of nitrated forages by, 179
Rumen Mucous Membrane—
Effects of ration preparation on, 215
Rumen Papillae—
Development of, in sheep on constant diet, 216

S

Salivary Gland Secretion—
Factors affecting parotid, in sheep, 214

Salt—
Effect on performance and carcass characteristics of steers, 95
Scours—
Effects of bacterial agents on, in pigs, 100
Selection—
For type by scorecard, 8
Selenium—
As a preventative of muscular dystrophy in lambs, 122
Selenium Poisoning—
Effectiveness of arsanilic in counteracting, in beef cattle, 123
Semen—
Effect of volume on fertility in gilts, 258
Egyptian cattle and buffaloes, 201
Fertility of bull, 202
Treatment of, with antibiotics on fertility in rabbits, 205
Serum Proteins—
Relationship of, to rates of gain in cattle, 32
Silage Fermentation—
Chemical changes accompanying, 190
Sire Tests—
Danish progeny testing stations, 26
Slaughter By-Products—
Poultry, in steer fattening rations, 164
Sodium Silicate—
Effect of, on urinary calculi and urinary constitutents, 115
Sorghum Silage—
Digestion of, by dairy cattle, 168
Effect of maturity on characteristics and subjective score of, 189
Soybean Hulls—
Digestibility and feeding value, 147
Sperm Concentration—
Effect on fertility in gilts, 258
Sperm Numbers—
Replenishment of, in bulls, 203
Sperm Motility—
Fluorescent dyes for studying, 204
Starch—
Effect of added, in wintering rations, 152
Stilbestrol—
Effect of atarex implants, with or without, on steers, 88
Effect of, on fattening lambs, 97
Effect of, on swine, 110
Effect on metabolism of calcium, phosphorus and nitrogen, 111
Stilbestrol—Cont.
Effect on performance of steers, 176
Effect on protein requirements of steers, 169
Effects on carcass of lambs, 41
Implantation in fattening steers and heifers, 90
Implants with pelleted rations for cattle, 93
Influence of, for steers, 95
Influence on ovulation rate and prenatal litter size in gilts, 225
Influence on steers fed alfalfa soilage, 186
Lambs fattened with and without, 91
Strontium—
Effects of the replacement of dietary calcium by, on pigs, 167
Suckling Lambs—
Complete mixed pelleted rations for, 73
Suckling Preference—
Of pigs and location of mammae, 222
Sulfur—
Sources for rumen microorganisms, 141
Swine—
Biometrical aspects of tests with, 6
Breed differences and loin eye, 2
Carcass quality, evaluated by live animal measurements, 1
Genetic correlations between growth and feed utilization in, 5

T

Taste—
Preferences of cattle, 70
Temperature—
Effect on thyroid activity, 235
Effects on thyroxine-I^{131} utilization, 234
Response of dairy heifers to, range, 233
Testosterone—
Implantation in fattening steers and heifers, 90
Propionate, effects on heifers, 251
Tetany—
Production of hypomagnesemic, in cattle, 120
Tetra Alkylammonium Stearate—
For pigs in dry lot and on pasture, 103
Effects of, on steer performance, 96
Tetrachlorocycline—
Effect on performance of steers, 176

Thyroid Activity—
Effect of grass-legume silage on, 172
Effect of temperature and light on, in sheep, 235
Thyroid Function—
Of young pigs, 228
Thyroid Secretion—
Effect of reserpine on, rate, 229
Thyroxine—
Effect of level on milk secretion, 230
Effect of temperature on, $-I^{131}$ utilization, 234
Secretion rate *vs* growth rate, 256
Tocopherol—
Interrelationship between magnesium and, in the dairy calf, 121
Tranquilizers—
Effect of, on fattening lambs, 218
Effect of, on milking cows, 220
Triiodothyronine—
Use of, in rations of swine, 108
Trimethylalkylammonium Stearate—
Use of, with sheep, 180
Twin Lambs—
Growth rate of like-sexed, 22

U

Ultrasonic Measurements—
For determining fatness and leanness in live animals, 52
Unidentified Growth Factors—
Effect of sources on pig, 125
Source in rations of brood sows, 165
Urea Utilization—
Relation of energy source to, by rumen microorganisms, 137
Urinary Calculi—
Effect of chemical and enzymatic agents on, 114
Effect of pelleting and antibiotics on, 113
Effect of sodium silicate on, 115

V

Viscera Weights—
Factors affecting, of hogs, 62
Vitamin A—
Contribution of dehydrated forage meals to liver stores of, in swine, 87
Effects of nitrate on storage in swine, 196
Influence on wool and reproductive performance of ewes, 148
Vitamin B—
Requirements of weanling pig, 82
Vitamin E—
As a preventative of muscular dystrophy in lambs, 122
Volatile Fatty Acids—
As roughage substitutes for lambs, 160
Effect of roughage-concentrate ratios upon production and recycling of, by rumen microorganisms, 143
Effects of protein and energy on, in the rumen, 145
In sheep fed all-hay ration, 180

W

Weanling Pig—
Energy value of feeds for, 81
Vitamin B requirements of, 82
White Muscle Disease—
Anti-vitamin E effect of fish liver oil, 149
Wintering—
Effect of level of, on beef heifers, 153
Influence of level of, on feed-lot performance of crossbred steers, 13
Wool—
Influence of vitamin A on, 148

X

X-ray—
Detecting animals heterozygous for dwarfism, 11

Y

Yerlikara Calves—
Effects of birth weight and quality of milk fed on gain of, 30

Z

Zinc—
Effect of dietary, and calcium on excretion of, 127
Effect of feeding, to pigs, 130
Requirement of growing pigs, 129
Serum alkaline phosphatase as affected by, in swine, 126
Toxicosis in the weanling pig, 128

SUBJECT INDEX FOR VOLUME 17, 1958

Note: Abstracts, by number, have a separate index at the end of the abstracts section

A

Alcohol—
n-Decyl, in control of alfalfa bloat, 893
Alfalfa—
Influence upon digestibility of oat silage, 194
Of varying phosphorus content, evaluation, 113
Utilization of tocopherol from dehydrated, 804
American Society of Animal Production—
American feed manufacturer's award, 267
Annual business meeting, 254
Chairmen of committees for 1958, 485
Executive committee, 909
Fifty years of growth and progress, 911
General session, 493
Memorials, 270
Morrison award, 269
Animal Husbandry—
Graduates in industry, 507
Animal Husbandry Curricula—
Reorientation and modification of objectives, 495
Animal Physiology—
Fifty years progress in, 1064
Animal Science—
Fifty years progress in teaching, 1101
The next fifty years in, 1119
Antibiotics
Influence on palatability of swine rations, 42
Supplementation for swine at three protein levels, 353
Artificial Rumen—
Technique for studying digestion *in vivo*, 667

B

Beef—
Effect of stilbestrol on quality factors, 834
Beef Cattle—
Accuracy of weights and gains, 604
Cervical mucus and estrus in, 322
Dicalcium phosphate and phosphoric acid for, 100
Beef Cattle—Cont.
Effect of calving date on calving performance, 527
Effect of feed additives on tissues, 124
Estimates of genetic and phenotypic parameters in, 675
Fifty years progress in breeding, 922
Fifty years progress in nutrition of, 981
Heritability of gestation length, 249
Heritability of growth rate, 675
High and low moisture corn for, 368
Influence of age, sex and season of birth of calf, 706
Utilization of vitamin A in different carriers by, 586
Biuret—
Utilization of, by lambs, 298
Bloat—
Control of alfalfa, 893
Effect of oils and penicillin, 374
Rumen fatty acids and, 304

C

Caecum—
Role of, in nutrient utilization, 684
Calcium—
Dietary, and zinc metabolism in pigs, 886
Effect of corn oil on metabolism of, 782
Effect of fat on requirement, in sheep, 797
Effect of stilbestrol on metabolism of, 343
Cannula—
Esophageal-fistula for sheep, 189
Carcass—
Characteristics of swine and live measurements, 825
Effect of stilbestrol on beef, 834
Relationship of ration and inheritance to characteristics to, in steers, 540
Carcass Grade—
Effect of diethylstilbestrol, testosterone and reserpine on, of lambs, 157
Factors affecting, of steers, 649
Carcass Traits of Swine—
Simple cut indices for predicting
Cut-out and loin area, 20
Measures of leanness, 27

Carotene—
Availability of, as influenced by soft phosphate, 662
Relation of forage, to plasma, 398
Cellulose—
Digestion by rumen microorganisms, 293
Digestion of, in forage plants by rumen microorganisms *in vitro*, 199
Effect of chlortetracycline feeding on digestion of, 656
Effects of volatile fatty acids on digestion of, 841
Influence of K, Na, Rb, Li and Cs on digestion of, 576
Mineral requirement for digestion of, 559
Cervical Mucus—
Related to estrus, 322
Chlortetracycline—
Effect on cellulose digestion, 656
Effect on cervical abscesses and weight gains of swine, 34
In lamb rations, 152
Reproduction in swine fed, 752
Cholagogue—
Effect in swine rations at three fat levels, 47
Corn—
High and low moisture, for cattle, 368
Corn Oil—
Effect on metabolism of calcium and phosphorus, 782
Corpora Lutea—
Number, weight, and progesterone content in swine, 405
Cotton Gin Trash—
Utilization by fattening steers, 133
Cows—
Effect of valeric acid on performance, 358
Creatinine—
Urinary and blood as measure of leanness of swine, 480

D

Diethylstilbestrol—(see stilbestrol)
Comparative effectiveness of oral and subcutaneous implantation, 164
Effect on growth and carcass grade of lambs, 157
Implantation in combination with chlortetracycline, 164
Digestibility—
Artificial rumen technique for study of, 667
Chromogen and standard methods with sheep, 318
Effect of chlortetracycline on, in rumen, 656
Influence of alfalfa upon oat silage, 194
Minerals requirement for cellulose, *in vitro* 559, 576
Role of caecum, 684
Digestion—
Carbohydrate, by rumen microorganisms, 284
Cellulose, rate of, by rumen microorganisms, 293
Effect of fat on, in sheep, 797
Effects of volatile fatty acids on cellulose, 841

E

Energy—
Interrelationships of protein, lysine and, for swine, 635
Estradiol—
Effect of, in the gilt, 534
Estrogen—
In soybean forage, 787
Estrus—
Cervical mucus as related to, in beef cattle, 322
Esophageal-Fistula Cannula—
Collecting forage samples by sheep with, 189
Extension Teaching—
Fifty years progress in livestock, 1088

F

Fat—
Effect in sheep rations, 171
Effect on digestion and calcium requirement, 797
Feather Meal—
As protein for swine, 468
Feces—
Diurnal variations in the composition of swine, 869
Feed Additives—
Effect on tissues of beef cattle, 124
For beef cattle, 368
Fetal Development—
Relationship of dam's regimen, breed and individuality in swine, 622

Fetal Weight—
Factors affecting, in swine, 612
Fleece Weight—
Methods of estimating, 593
Forage—
Esophageal-fistula cannula for collecting with sheep, 189
Forage Plants—
Effect of stage of maturity and lignification on the digestion of cellulose in, 199
Furazolidone—
In swine rations, 313

G

Gastro-Intestinal Tract—
Rate of food passage through, 218
Gestation Length in Beef Cattle—
Heritability and repeatability of, 249
Goats—
Responses to temperature, 326
Goitrogens—
Effectiveness in cattle, 227
Grain Sorghum—
For growing-finishing swine, 813

H

Haemonchus Contortus—
Resistance of lambs to, 363
Heat Tolerance—
Factors concerned in, of cattle, 473
Herefords—
Reproductive performance of, 336
Horses—
Fifty years of research on nutrition of, 1007

I

Inbreeding—
Effects of, in swine, 426, 456
Iso-Valeric Acid—
Effect on performance of milking cows, 358

K

Kikuyu Grass—
Digestibility of, 318

L

Lambs—
Comparison of, from Western (Columbia-Rambouillet) ewes, 763
Variation in body weights, 743
Lecithin—
In the control of alfalfa bloat, 893
Leukocytes—
In inoculated uteri of rabbits, 416
Lignification—
Effect on digestion of cellulose in forage plants, 199
Limited Feeding—
Effect on growth and carcass of swine,
Feed lot performance, 3
Carcass characteristics, 13
Linecrossing—
Effect of, in swine, 441, 456
Litter Size—
Factors affecting, in swine, 612
Live Probe—
As measure of leanness of swine, 480
Livestock Judging—
Fifty years with, 1058
Lysine—
Interrelationships of protein, and energy for swine, 635
L-Lysine—
Requirement of weanling pig, 52

M

Marbling—
Specific gravity as measure of, 693
Meat Meal—
Effect on rumen microbial activity, 391
Effect on steers, 391
Meat Research—
Fifty years progress in, 1079
Methionine—
Supplementation for swine at three protein levels, 353
Milk Lambs—
Adjustment of weaning weights to standard age, 521
Minerals—
Influence on cellulose digestion by rumen microorganisms, 576
Influence of sodium and potassium in lamb rations, 576
Requirement of rumen microorganisms for cellulose digestion, 559
Molybdenum—
Dietary essential for lambs, 180

N

News and Notes—
272, 486, 903, 1252

O

Oat Silage—
Digestibility, as influenced by alfalfa, 194
Oil-Bearing Seeds—
In lamb fattening rations, 819
Oils—
Effect of, on bloat, 374
In the control of alfalfa bloat, 893

P

Palatability—
Swine rations, influence of antibiotics on, 42
Parakeratosis—
Microflora of intestines and feces of pigs showing, 714
Pasture Grasses—
Foliar application of urea to, 209
Penicillin—
Effect of, on bloat, 374
In the control of alfalfa bloat, 893
Phosphate—
Effect of soft, on carotene and vitamin availability, 662
Ruminal utilization of sodium meta-, ortho- and pyro-, 792
Phosphorus—
Availability from various materials for swine, 73
Dicalcium phosphate and phosphoric acid for beef cattle, 100
Effect of corn oil on metabolism of, 782
Effect of stilbestrol on metabolism of, 343
Requirement of calves, 89
Utilization of phytin, by sheep, 104
Varying content of alfalfa hay, 113
Phytin Phosphorus—
Utilization by sheep, 104
Pituitary Gland—
Effect of progesterone and estradiol on gonadotrophic potency of, 534
Prickly Pear Cactus—
Foliar application of urea to, 209
Progesterone—
Corpora lutea content in swine, 405
Effect of, in the gilt, 534
Effect of, on reproduction, 386
Effect on prenatal survival in gilts, 879
Protein—
Feather meal as a source of, 468
Protein—Cont.
Interrelationships of lysine, energy and, for swine, 635
Value of supplements of, for sheep, 758
Protein Levels—
For growing swine, 353
Methionine and antibiotic supplementation at different, for swine, 353

R

Rabbits—
Leukocytes and bactericidal substances in inoculated uteri of, 416
Sperm output and fertility of, 243
Ramie Forage—
Digestibility of, 318
Reproduction—
Of swine fed chlortetracycline, 752
Performance in sows when litters weaned at 10, 21 or 56 days, 862
Performance of Hereford herd, 336
Performance of nursed and milked cows, 640
Progesterone administration on, 386
Research—
277
Reserpine—
Effect on growth and carcass of lambs, 157
Roughages—
Vitamin D content of, 410
Rumen—
Fatty acids in feed lot bloat, 304
Studies on the *in vitro*, procedure, 841
Volatile fatty acid production in bovine, 723
Rumen Bacteria—
In feed lot bloat, 304
Rumen Microorganisms—
Digestion of cellulose by, 293
Digestion of cellulose in forage plants by, 199
Digestion of glucose, starch and cellulose by, 284
Effect of meat meal on, 386
Effect of starvation and subsequent refeeding on, 774
Fatty acid production by, 737
Influence of K, Na, Rb, Li and Cs on digestion by, 576
Mineral requirement of, for cellulose digestion, 559

Rumen Microorganisms—Cont.
Response to pasture grasses, and prickly pear cactus after foliar application of urea, 209
Utilization and synthesis of valeric acid by, 284

S

Selection—
Effects of, in swine, 426, 456
Semen—
Dilution and storage of boar, 543
Fertility of boar, after storage, 554
Fertilization rates obtained with boar, after storage, 598
Sheep—
Fifty years progress in breeding, 944
Fifty years progress in nutrition, 1015
Soybean Forage—
Estrogenic activity of, 787
Specific Gravity—
As objective measure of marbling, 693
Determination of, by air displacement, 513
Sperm—
Output and fertility of rabbits, 243
Starvation—
Effect on rumen microorganisms, 774
Stilbestrol—
Effect on endocrine organs in lambs, 569
Effect on mineral metabolism in lambs, 343
Effect on quality of beef, 834
Responses in lambs fed rations differing in calorie to protein rations, 140
Treated steers and lambs fed tapazole, 851
Swine—
Air temperature and weight gain, 62
Diurnal variations in feces of, 869
Factors affecting litter size and fetal weight, 612
Measures of leanness of, 480
Microflora of intestinal contents and feces of, 714
Ohio Swine Evaluation Station, 875
Rate and economy of gains of pigs weaned at 10, 21 or 56 days, 862
Relationship of dam's regimen, breed and individuality to fetal development, 622

T

Tallow—
In lamb fattening rations, 819
Tapazole—
Influence on stilbestrol treated steers and lambs, 851
Teachings—
Fifty years progress in animal science, 1101
Temperature—
Response of goats to, 326
Weight gain of swine and, 62
Testosterone—
Effect on carcass grade of lambs, 157
Tetra Alkylammonium—
In lamb rations, 152
Texel Sheep—
Multiple birth in, 235
Tocopherol—
Utilization of, from dehydrated alfalfa, 804
Topcrossing—
Effect of, in swine, 441, 456
Transaminase—
Serum, in white muscle disease, 224

U

Urea—
Foliar application to pasture grasses and prickly pear cactus, 209
Utilization of, by lambs, 298

V

Valeric Acid—
Effect on performance of milking cows, 358
Utilization by rumen microorganisms, 284
Vitamin A—
Availability of, as influenced by soft phosphate, 662
Relation of forage carotene to plasma, 398
Utilization of, in different carriers by beef cattle, 586
Vitamin D—
Effect of, in rations for pigs, 699
In roughages, 410

Volatile Fatty Acids—
From various feeds by bovine rumen microorganisms, 737
Rates of production in the bovine rumen, 723

W

Weanling Pig—
Requirement of, for l-lysine, 52
Weights—
Accuracy of, in beef cattle, 604
Variation in body, of lambs, 743
White Muscle Disease—
Serum Transaminase in, 224

X

Xanthurenic Acid—
Excretion by swine, 68

Z

Zinc—
Metabolism and dietary calcium in pigs, 886

AUTHOR INDEX FOR VOLUME 17, 1958

Note: Abstracts, by number, have a separate index at the end of the abstracts section
